WOODEN TILES

Rethink wood flooring.

Let your new wood-flooring be the protagonist of your home! Get inspired with new ideas to makeover your own place choosing the innovative GIANT® Tiles made of prestige solid wood, in an array of patterns and rare wood-species. You can pave the whole area of your rooms with tiles or create an inset rug pattern in the traditional wood-flooring with straight installation, made out of the same or of a different wood species, as you like it better!

Tiles made 100% of solid wood.

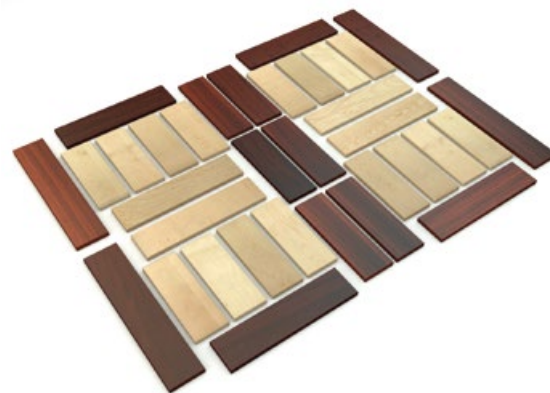

GIANT® tiles are all made of prefinished solid hardwood flooring planks 20 mm. thick with various fixed lengths that are arranged in a decorative pattern to create a mosaic effect. This kind of laying pattern is peculiarly suitable for paving wide and prestigious rooms.

They are supplied as loose pieces beveled on 4 sides and with groove & groove on all 4 sides, that can be easily assembled on construction site through spline joints [supplied with each order].

We suggest to enhance the symmetry of the patterns paving the perimeter zone of the room with classic GIANT® [random lengths and straight installation], that creates a beautiful contrast compared with the wooden tiles and gives you the chance to avoid the installation of incomplete modules.

Reinventa il tuo parquet.

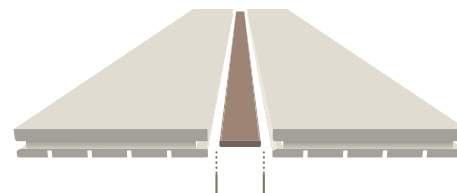

Fai del tuo nuovo parquet il protagonista della tua casa! Lasciati ispirare da nuove idee per dare personalità ai tuoi spazi, scegliendo le innovative composizioni GIANT®, realizzate in prezioso legno massiccio e disponibili in vari disegni di posa e specie lignee rare. Puoi utilizzare i quadri GIANT® per pavimentare l'intera superficie della stanza o inserire solo qualche quadro nella pavimentazione in parquet con posa a correre.

Quadri realizzati con il 100% di legno nobile.

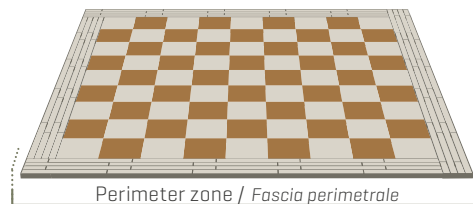

I Quadri GIANT® sono realizzati con listoni di parquet di varie lunghezze fisse, in legno nobile massiccio prefinito di 20 mm. di spessore, che vengono installati secondo una precisa geometria di posa, che genera un disegno unico e caratteristico. Questa tipologia di posa, molto scenica e decorativa, si presta particolarmente a pavimentare ambienti spaziosi e prestigiosi.

I listoni, che danno vita al disegno di posa, vengono forniti bisellati e con profilo femmina-femmina sui 4 lati. Devono essere incastrati durante l'installazione tramite apposite anime in legno, che sono da noi fornite in ogni ordine.

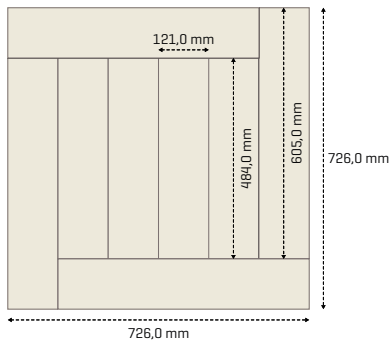

Spline joint / Anima in legno

Consigliamo di mettere in risalto la simmetria dei disegni di posa completando la pavimentazione con una fascia perimetrale realizzata con GIANT® classico [lunghezze miste e posa a correre], che crea un piacevole contrasto rispetto alla restante pavimentazione in legno e dà la possibilità di evitare l'installazione di moduli incompleti.

HERRINGBONE PATTERNS

The same quality as usual in a new shape: this is the fresh novelty of the latest GIANT® collection.

Herringbone patterns that featured the noble mansions of the past (their first use in wooden floors in Europe dates back to 16th century) have been used frequently in design and now they are living a new youthfulness in the field of architecture. GIANT® rides the wave of this decorating trend adding the preciousity

of its solid parquet boards to the opulent design of the most wanted patterns: elegant geometrical and symmetrical motifs that add class and sophistication in both residential and commercial spaces. Just as traditional GIANT®, our herringbone parquets are all perfectly compatible with underfloor heating.

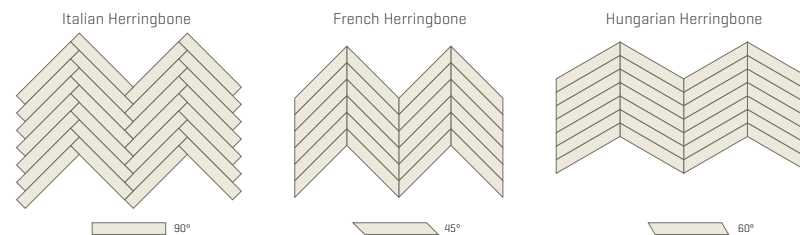

La stessa qualità di sempre, ma in forma diversa: questa è la novità dell'ultima collezione GIANT®.

Le pose a spina che caratterizzavano i palazzi nobiliari del passato (le prime realizzazioni in Europa risalgono al 16° secolo) sono state usate frequentemente nel mondo del design e ora stanno vivendo una nuova giovinezza in campo architettonico. GIANT® ripropone questo trend decorativo, unendo il prestigio dei sui

autentici listoni massicci alle pose a disegno più richieste oggi: schemi geometrici e disegni simmetrici che donano raffinatezza e un'atmosfera esclusiva sia a spazi residenziali che commerciali. Come tutti i pavimenti in legno massiccio GIANT®, anche la nostra collezione di spine è ideale per il riscaldamento a pavimento.
